Dear Students, Faculty, and Staff,

We are writing to inform you that 19 students tested positive for Covid on Wednesday, April 27. This brings our total count to 33 students and 3 employees. It appears that the majority of the student cases are among different friendship groups. We appreciate the students for requesting to be tested and we encourage anyone that is not feeling well to be tested. The testing trailer is located near the baseball field and open Monday through Friday, 9:30 a.m.-3:30 p.m.

As we monitor this latest increase in cases, all campus operations will continue as scheduled. It is especially important to follow the masking expectations that we shared with you on [March 11](#). Indoor mask mandates remain in effect in the following locations:

- All classroom, lab, studio, and instructional spaces during scheduled classes
- All healthcare facilities
- Indoor athletic and performance art events, or other gatherings that include external audiences
- Any campus space where signage indicates masking is required
- Individual offices and group meetings when requested by the host or participants

All campus community members are required to keep a mask with them at all times and should be prepared to wear it upon entering a space where it is required or upon request.

Thank you for your continued attention this matter. We will continue to keep the dashboard updated so that you can remain informed.

Thank you,

Joe DiChristina, Vice President for Student Success and Enrollment Management
Dan Hitchell, Vice President of Finance and Chief Financial Officer
